PROJECTS

mAInLine - *MERN Stack, Kotlin, Gemini API* | API Developer

June 2025

GeminiKnights - 12-Hour UCF Knight Hacks Hackathon

- Collaborated on the development of a mobile and web-based personal emergency app that automatically contacts 911 during medical crises.
- Integrated Gemini API** to summarize medical data and **Twilio API** to deliver voice calls with critical information to emergency responders
- Designed a **user-friendly UI** for quick emergency access, **prioritizing user accessibility** and minimal input during an emergency

ZenithFit - *MERN Stack* | Frontend Developer, Project Manager

November 2025

- Designed and implemented responsive user interfaces using React.js and Bootstrap 5, **improving cross-device usability and load performance by 30%**.
- Collaborated with 3 other students to develop a **web-based and mobile application** used for tracking workouts and making measurable progress towards goals.
- Integrated RESTful API endpoints** for transaction retrieval, user authentication, and account management using NodeJS and JWT-based sessions.
- Built modular React components** (e.g., calendar) to promote reusability and maintain a clean component hierarchy.
- Deployed the full-stack MERN application to Digital Ocean, implementing **CI/CD pipelines for automated builds and pull request previews**.
